DEPARTMENT: Application Development
JOB TITLE: Application Development Engineer
REPORTS TO: Application Development Team Lead

Summary Description:

Design and develop web based healthcare software and provide engineering services for Axolotl customers.

Essential Duties and Responsibilities:

- Achieve an excellent understanding of Axolotl's web based healthcare applications.
- Design and develop new product features and enhancements, following standard development process.
- Provide engineering services to customers. Understand and analyze customer technical requirements and environments; and develop software solutions to address their needs.
- Troubleshoot and solve customer technical problems raised by Axolotl's technical operations team.

Knowledge, Skills and Abilities:

- Strong technical and excellent trouble shooting skills.
- Good programming skills. Solid understanding of fundamental computer science principles: object-oriented design, structured design, databases, algorithms, data structures, service-oriented architecture (SOA) concepts
- Web development experience (HTML, XML, XSL, CSS, JavaScript, AJAX, Java/J2EE/JSP, Web Service) is a big plus.
- Ability to work with diverse technologies, independently or as part of a team.
- Excellent follow-through skills; self-motivated and detail-oriented.
- Strong work ethic and desire to grow and develop with the company.
- Good verbal and written communication skills.
- Bachelor's degree in a technical field, or equivalent experience.
